Spectrum Brands Australia Pty Ltd and Spectrum Brands New Zealand Ltd Warranty Against Defects

In this warranty:

Australian Consumer Law means the Australian consumer law set out in Schedule 2 to the Competition and Consumer Act 2010;

CGA means the New Zealand Consumer Guarantees Act 1993;

Goods means the product or equipment which was accompanied by this warranty and purchased in Australia or New Zealand, as the case may be;

Manufacturer, We or us means:

1. for Goods purchased in Australia, Spectrum Brands Australia Pty Ltd ABN, 78 007 070 573;
or
2. for Goods purchased in New Zealand, Spectrum Brands New Zealand Ltd, as the case may be,
contact details as set out at the end of this warranty;

Supplier means the authorised distributor or retailer of the Goods that sold you the Goods in Australia or in New Zealand; and

You means you, the original end-user purchaser of the Goods.

1. Our goods come with guarantees that cannot be excluded under the Australian Consumer Law, or the CGA. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.
2. The benefits provided by this Warranty are in addition to all other rights and remedies in respect of the Goods which the consumer has under either the Australian Consumer Law or the CGA. The original purchaser of the Goods is provided with the following Warranty subject to the Warranty Conditions:
3. We warrant the Goods for all parts defective in workmanship or materials from the date of purchase (Warranty Period), for the period of:-
 - (a) Two (2) years for Russell Hobbs products (see product packaging for details)
 - (b) Two (2) years with five (5) year motor warranty for Russell Hobbs products (see product packaging for details)
 - (c) Limited Lifetime, Ten (10) years for Russell Hobbs cookware.
 - (d) One (1) year for George Foreman, iRobot, Westinghouse, Black & Decker and Spectrum Brands products.

If the Goods prove defective within the Warranty Period by reason of improper workmanship or material, we may, at our own discretion, repair or replace the Goods without charge.

Warranty Conditions

4. The Goods must be used in accordance with the manufacturer's instructions. This Warranty does not apply should the defect in or failure of the Goods be attributable to misuse, abuse, accident or non-observance of manufacturer's instructions on the part of the user. As far as the law permits, the manufacturer does not accept liability for any direct or consequential loss, damage or other expense caused by or arising out of any failure to use the Goods in accordance with the manufacturer's instructions.
5. Exhaustible components (such as batteries, filters and brushes) of the Goods are included under this Warranty only where there is a defect in workmanship or materials used.
6. The warranty granted under clause 3 is limited to repair or replacement only.
7. Any parts of the Goods replaced during repairs or any product replaced remain the property of the manufacturer. In the event of the Goods being replaced during the Warranty Period, the warranty on the replacement Goods will expire on the same date as for the Warranty Period on the original Goods which are replaced.
8. In order to claim under the warranty granted under clause 3 you must:
 - (a) Retain this warranty with your receipt/proof of purchase; and
 - (b) Return the Goods to us at the relevant address or to the Supplier by prepaid freight within the Warranty Period accompanied with (i) the legible and unmodified original proof of purchase, which clearly indicates the name and address of the Supplier, the date and place of purchase, the product name or other product serial number and (ii) this warranty.
9. This warranty is immediately void if:
 - (a) Any serial number or appliance plate is removed or defaced;
 - (b) The Goods have been serviced or otherwise repaired by a person not authorised to do so by us or where non approved replaced parts are used.
10. The Goods are designed for domestic use only. A limited 90-day Warranty applies to any industrial or commercial use of the Goods. The Goods must be connected to the electrical voltage requirements as specified in the ratings label located on the Goods.
11. This warranty does not cover the cost of claiming under the warranty or transport of the Goods to and from the Supplier or us.
12. This warranty is only valid and enforceable in Australia against Spectrum Brands Australia Pty Ltd and in New Zealand against Spectrum Brands New Zealand Ltd.

Contact us or the Supplier for further details.

Register your product online

If you live in Australia please visit: www.spectrumbrands.com.au/warranty

If you live in New Zealand Please visit: www.spectrumbrands.co.nz/warranty

Registration of your warranty is not compulsory, it gives us a record of your purchase AND entitles you to receive these benefits: Product information; Hints and tips; Recipes and news; Information on special price offers and promotions.

Any questions? Please contact Customer Service for advice.

INSTRUCTIONS

Congratulations on the purchase of your Russell Hobbs appliance. Each unit is manufactured to ensure safety and reliability. Before using the appliance for the first time, please read the instruction booklet carefully and keep it for future reference. Pass it on if you pass on the appliance.

When using electrical appliances, basic safety precautions should always be followed.

Before using electrical appliances, basic safety precautions should always be followed.

Before Using For the First Time

Fill the water tank with clean water, and then empty the water to ensure the tank is clean of any manufacturing residues. Refill the tank.

- The iron may give off an odour and small amount of vapour when switched on for the first time. This is normal and will stop as the element cures.
- Press the steam shot button  3 or 4 times, to prime and flush clean water through the burst of steam pump
- Press the spray mist button  3 or 4 times, to prime and flush clean water through the spray mist pump.
- Iron an old piece of dampened cotton fabric or linen, to clean the soleplate.

Auto Shut-Off

- The iron will switch itself off if it's motionless for 30 seconds with the soleplate down, or on its side, or 8 minutes sitting upright.
- Lift it, tilt it forward, then sit it upright to return to its operating temperature (25-45 seconds, depending on the setting).

Preparation

- Check for textile care symbols (   ) on items to be ironed.
- Begin your ironing with fabrics that need low temperatures , then those that need medium temperatures , and finish with those needing high temperatures .

Filling

You may use the iron with tap-water, however if you live in a hard water area, you should use distilled water (not chemically descaled or softened water).

If you buy distilled water, check it is marked as suitable for use in irons.

- Unplug the iron from the wall power outlet.
- Slide the steam control to no steam .
- Hold the iron with the soleplate down.
- Lift the tabs of the water inlet cover to open it.
- Fill slowly, to let the air in the water tank escape, otherwise you will cause an air lock and the water may overflow.
- Do not fill past 'max', or water may spill whilst in use.
- Close the water inlet cover.
- Wipe up any spillage.

Switching On

- Set the temperature control dial to the lowest setting – fully counter-clockwise.
- Set the steam control to .
- Sit the iron on its heel.
- Plug the power cord into the wall power outlet and switch the outlet on.
- Turn the temperature control dial clockwise to bring the desired setting on the dial next to the  mark.
- The thermostat light will come on. The colour of the thermostat depends on the setting.
- The colours are:

Blue	On
Green	•
Yellow	• •
Purple	• • •
Red	max
- The thermostat light will flash while the temperature is building up, then glow steadily when the set temperature is reached.
- The thermostat light may flash during use, indicating the element is maintaining the set temperature.

Temperature Setting Guide		
LABEL MARKING	TEMPERATURE DOT SETTING	COLOUR
 cool - nylon, acrylics, polyester, synthetics	•	green
 warm - wool, polyester mixtures, silk	• •	yellow
 hot - cotton, linen denim	• • •	purple
 do not iron	max	red

NOTE: If the instructions on the fabric label differ from this guide, follow the instructions on the label.

Reducing Temperature

- To reduce the temperature, turn the temperature control dial counter-clockwise to bring the desired setting on the dial next to the  mark.
- The thermostat light will change colour depending on the setting.
- The reduction in temperature can take time, as the iron has to lose the heat it has built up. It is best to organise your ironing so that you do not need to reduce the temperature (refer to the “preparation” section, pg 6).

CAUTION: If you intend to iron delicate fabrics after using the iron at higher temperatures, ensure that you allow enough time for the soleplate to cool. The thermostat light only flashes while heating and will remain on if the soleplate is at or above the set temperature.

Steam Ironing

- When steam ironing, you must set the temperature control at  or higher. If you don't, you may get water on your clothes, not steam.
- Move the steam control to the setting you want,  = no steam,  = high steam.
- Wait until the thermostat light glows steadily, then start ironing.

Spray

Water spotting affects some fabrics. Test this out on a hidden part of the fabric.

- This works with dry or steam ironing, as long as there is water in the water tank.
- Check that there is water in the water tank.
- Lift the iron off the fabric.
- Aim the spray nozzle at the fabric.
- Press the spray mist  button.
- You may have to press it 2 or 3 times to pump water through the system.

Steam Shot

This works with both dry and steam ironing, as long as there is water in the water tank.

- Check that there is water in the water tank.
- Check that the temperature control is at  or higher.
- Press the steam shot  button.
- You may have to press it 2 or 3 times to pump water through the system.
- Leave 4 seconds between bursts, to let the temperature build up.

Dry Ironing

- Move the steam control to .
- Wait until the thermostat light is steady, then start ironing.

Vertical Steaming

Vertical steaming removes wrinkles from hanging clothes, hanging curtains, and furnishing fabrics.

- Check that there is adequate ventilation behind the fabric, otherwise moisture may build up, causing mildew.
- Check that there is nothing behind the fabric that may be damaged by steam.
- Check that pockets, turn-ups, and cuffs are empty.
- Check there is water in the water tank.
- Turn the temperature control dial to **max**, move the steam control to .
- Hold the iron close to (but not touching) the fabric.

- Press the  button (you are using the “steam shot” function vertically).
- You may have to press it 2 or 3 times to pump water through the system.
- Leave 4 seconds between shots, to let the temperature build up.

After Use

- Set the temperature control to the lowest setting – fully counter clockwise.
- Move the steam control to .
- Unplug the iron.
- Open the water inlet cover.
- Hold the iron over a sink, turn it upside down, and drain the water from the water tank.

CAUTION: The water may be hot.

- Sit the iron on its heel.
- Leave it to cool down completely.
- When it is cold, wipe off any moisture, and close the water inlet cover.
- Store the iron on its heel, to avoid corrosion and damage to the soleplate.

Self Clean

To prevent scale building up, use the self clean function regularly, at least monthly in normal water areas, more often in hard water areas.

- You will require a basin or a large bowl to catch the water coming out of the soleplate.
- Fill the water tank to the ‘**max**’ level.
- Turn the temperature control to ‘**max**’, move the steam control to .
- Sit the iron on its heel.
- Put the plug into the power socket, and wait until the thermostat light steadies.
- Now hold the iron over the basin or bowl, with the soleplate facing down.
- Press the self clean button , hold it there, and gently move the iron to and fro, over the basin or bowl.

CAUTION: Keep clear of the escaping water and steam.

- Water and steam will wash scale and dust through the soleplate, and into the basin or bowl.
- When the water tank is empty, release the self clean button .
- Unplug the iron, and sit the iron on its heel to cool.

- When it is cold, wipe off any moisture.
- Store the iron on its heel, to avoid corrosion and damage to the soleplate.

Anti-scale

- The anti-scale agent incorporated in the iron helps prevent build-up of scale.
- Do not use descaling solution, or you will destroy the anti-scale agent.

Cleaning

- Unplug the iron when not in use, before moving and before cleaning. Let it cool down fully before cleaning and storing away.
- Wipe outer surfaces with a damp cloth. If necessary, use a little dishwashing liquid.
- Remove spots from the soleplate with a little vinegar.
- Take care not to scratch the soleplate.
- Do not immerse the iron in water or any other liquid.
- Do not use harsh or abrasive cleaning agents or solvents.

IMPORTANT SAFEGUARDS

When using electrical appliances, basic safety precautions should always be followed, including, but not limited to the following:

- 1.** To protect against electrical hazards, do not immerse the power cord, plug or iron in water or any other liquid.
- 2.** Do not use outdoors or in damp or moist areas.
- 3.** Do not touch hot surfaces, always use the appliance handles.
- 4.** This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- 5.** This appliance must be attended whilst plugged in.
- 6.** Ensure the iron is standing on its heel and with the soleplate clear of any surrounding objects when switching on.
- 7.** Ensure the iron is unplugged during filling and emptying.
- 8.** Always turn off and unplug from the wall power outlet when not in use.
- 9.** To avoid possible burns, ensure the appliance is off and has cooled before cleaning.
- 10.** To disconnect, turn off the wall power outlet, then grasp and pull the plug from the wall outlet. Never pull by the cord.
- 11.** Do not operate this appliance with a damaged cord/plug or after the appliance has been dropped, damaged or has malfunctioned in any manner. Contact Customer Service for examination, adjustment, repair or replacement.
- 12.** There are no user serviceable parts. If power cord is damaged, it must be replaced by the manufacturer or similarly qualified person in order to avoid a hazard.
- 13.** Do not use on an inclined or unstable surface.
- 14.** Keep the iron and the power cord away from the edge of tables or countertops and out of reach of children and infirm persons.
- 15.** Ensure the power cord does not present a tripping hazard.
- 16.** Do not place on or near any heat sources.
- 17.** Follow the instructions when cleaning this appliance.
- 18.** Do not use this appliance for other than its intended purpose.
- 19.** Do not leave the iron unattended when switched on or where it may be touched by children or infirm persons while it is still hot.
- 20.** This appliance is not a toy. Children should be supervised to ensure they do not play with the appliance.
- 21.** This appliance is not intended to be operated by means of an external timer or separate remote control system.
- 22.** For added safety, electrical appliances should be connected to a power outlet that is protected by a residual current device (RCD), also often referred to as a 'Safety Switch'. Your switchboard may already incorporate an RCD. If unsure, call an electrician for verification and fitting if necessary.
