HOUSEHOLD USE ONLY

BEFORE USING FOR THE FIRST TIME

Set the browning level to maximum (7). Operate the appliance empty, to cure the new elements. This may smell a bit, but it's nothing to worry about. Ensure the room is well ventilated.

TOASTING BREAD

1. Sit the toaster upright on a firm, level, heat-resistant surface.
2. Put the plug into the power socket.
3. Turn the browning control to the required setting (1 = light, 7 = dark).
4. Put bread into the toasting slots (maximum thickness 27mm).
5. Press the lever down fully. It won't lock down unless the toaster is connected to the electricity supply.
6. The  light will glow, and the elements will heat up.
7. When it's done, the toast will pop up.
8. To stop toasting, press .

FROZEN BREAD

1. Leave the browning level at your favoured setting, insert the frozen bread, lower the lever, then press .
2. The  light will glow, and the toasting time will be altered automatically to give the same degree of browning you get with unfrozen bread.

REHEATING TOAST

1. Leave the browning control at your favoured setting, insert the bread, lower the lever, then press .
2. The  light will glow, and the toast will be given a short burst of heat. Don't reheat "battered", torn, or misshapen bread.

HINTS AND TIPS

- Old (yesterday's) bread has less moisture, so makes crisper toast.
- Old bread, thin slices, and sweet bread products (tea cakes, fruit loaf, etc.) brown faster – use a lower setting.

CARE AND MAINTENANCE

1. Unplug the toaster and let it cool down.
2. Wipe outer surfaces with a damp cloth.

ENVIRONMENTAL PROTECTION

To avoid environmental and health problems due to hazardous substances in electrical and electronic goods, appliances marked with this symbol mustn't be disposed of with unsorted municipal waste, but recovered, reused, or recycled.
