

filtered water bottle

Read the instructions, keep them safe, pass them on if you pass the bottle on. Remove all packing, but keep it till you're sure the bottle functions.

important safeguards

- The bottle must only be filled by or under the supervision of a responsible adult.
- Fill it only with cold (between 2°C and 30°C), potable water, from a known source of safe drinking water.
- Don't put any part in boiling water.
- Don't let any part become frozen.
- Don't use the bottle if it's damaged, if it malfunctions, or if it leaks – the contents may become contaminated.
- Use the bottle only for dispensing fresh cold drinking water.

household use only

before first use

- Before using the bottle for the first time, or after replacing the filter, fill the bottle, fit the lid, and squeeze the bottle empty via the spout, into the sink.
- This will prime the filter, and avoid any staleness.

filling

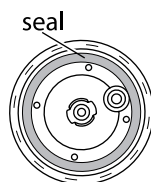

- Unscrew the lid, and lift it off the bottle.
- Fill the bottle from a source of safe drinking water.
- Fill it only to the top "bend" (0.6 litre/600ml), to leave room for the filter.
- Screw the lid back on the bottle.
- Turn the bottle upside down over the sink, and shake it, to check it's properly sealed.

drinking

- Pull the spout away from the lid (about 4mm).
- Tilt the bottle to raise the bottom above the spout.
- Either suck the water from the spout, or squeeze the bottle gently, to squirt water into your mouth.
- Push the spout towards the lid (about 4mm), to seal it.

cleaning

- Don't clean the filter – you'll destroy it.
- Pull the spout away from the lid, to open it for cleaning.
- Unscrew the lid, and lift it off the bottle.
- Unscrew the filter from the lid.
- Hand wash the bottle and lid in warm soapy water.
- Rinse thoroughly, to remove all trace of soap.
- Check that the seal inside the lid hasn't come off – if it has, poke it back into place with a cocktail stick.

- Screw the filter back into the lid – fit a fresh filter, if necessary.
- Fill the bottle from a source of safe drinking water.
- Screw the lid back on the bottle.
- Squeeze some water via the spout, into the sink, to prime the filter.
- If you replaced the filter, squeeze the bottle empty, via the spout, then refill it.
- Push the spout back into the lid, to seal it.

general

- Don't leave water in the bottle for more than a day – it'll go stale.
- The filter will handle up to 375 litres of water, depending on your local water supply, but, for best results, we recommend replacing it after 2 to 3 months.
- The simplest guide is to change the filter whenever you notice a change in the taste of the water.
- After replacing the filter, squeeze the bottle empty via the spout, into the sink, to prime the filter, and avoid staleness.
- Don't fiddle with the valve – it lets air into the bottle as you take water out.

disposal

- Sadly, nothing lasts forever. When your bottle comes to the end of its life, it can be disposed on along with your normal household waste.
- If you have access to a recycling scheme, you'll want to know that the bottle is made from low density polyethylene – LDPE

service

The product isn't user-serviceable. If it's not working, read the instructions. If it's still not working, consult your retailer.

If that doesn't solve the problem – ring Customer Service – they may be able to offer technical advice.

If they advise you to return the product to us, pack it carefully, include a note with your name, address, day phone number, and what's wrong. If under guarantee, say where and when purchased, and include proof of purchase (till receipt). Send it to:

Customer Service, Salton Europe Ltd, Failsworth, Manchester M35 0HS

email: service@saltoneurope.com

telephone: 0845 658 9700 (local rate number)

guarantee

Defects affecting product functionality appearing within one year of purchase will be corrected by replacement or repair provided the product is used and maintained in accordance with the instructions. Your statutory rights are not affected. Documentation, packaging, and product specifications may change without notice.

replacement filters – available in packs of 2 – part No 17941

- from the retailer where you bought the bottle
- from the website – www.clear2go.co.uk
- from Customer Service – ring 0845 658 9700, or email service@saltoneurope.com, for prices, then purchase replacements using VISA or MASTERCARD.
