# REMINGTON

## CORDED EPILATOR

# ENGLISH

**Thank you for choosing Remington®. Our products are designed to meet the highest standard of quality, functionality and design. We hope you enjoy using your new Remington® product.**

**The Remington® epilator removes hair from the legs, arms, bikini line and underarms. It removes hair from the root all over the body so you'll be soft and smooth for up to 4 weeks.**

**Please read the instructions for use carefully and keep them in a safe place for future reference. Only use the epilator for use as described in this instruction booklet.**

## GENERAL INFORMATION ON EPILATION

This Remington® epilator has been designed to make the removal of unwanted hairs as efficient, gentle and easy as possible. Its curved epilation head is especially designed to fit the contours of your body and the hair guides channel fine, short and flat hair into the tweezer discs.

The rotating tweezers catch even the shortest hairs (minimum length 0.5mm) and pull them out by the root. The hairs that grow back are soft and thin. Epilating leaves your skin smooth and hair-free for several weeks.

If you have not used an epilator before, or if you have not epilated for a long period of time, it may take a short while for your skin to adapt to epilation. The discomfort experienced at first is considerably reduced with repeated use as the skin adjusts to the process.

Using an epilator may cause reddening or irritation of the skin. This is a normal reaction that will quickly disappear. However, you should consult your doctor if the irritation has not disappeared within three days.

All methods of hair removal from the root can result in in-growing hair depending on the condition of the skin and hair. Regular exfoliation helps to prevent in-growing hair.

In some cases inflammation of the skin could occur when bacteria penetrate the skin (e.g. when sliding the appliance over the skin). Thorough cleaning of the epilation head before each use will minimise the risk of infection.

### Some useful tips

- ▶ When using an epilator for the first time it is best to try it on a small area to get used to the process of epilation.
- ▶ The optimum length for hair removal is between 2-5mm. Epilation is easier and more comfortable.
- ▶ Take a warm bath or shower before epilating and exfoliate to remove dead skin cells. This will make your skin more pliable, making the epilation process less uncomfortable.
- ▶ Epilate in the evening so that any possible reddening can disappear overnight.
- ▶ After use you can use a body cream or aloe lotion to soothe the skin and reduce skin irritation.
- ▶ Regularly exfoliate after epilation to avoid in-growing hair.

## CAUTION

Use this appliance only for its intended use as described in this manual.  
Do not use this product if it is not working correctly, if it has been dropped or damaged, or dropped into water.

- ◆ Always store the epilator in a cool, dry place.
- ◆ Do not use the epilator in close proximity to water.
- ◆ The epilator can be attached to a mains voltage of 100V-240V.

## DESCRIPTION

- 1 Protective cap (Not shown)
- 2 Tweezers
- 3 Head assembly
- 4 Head assembly release button
- 5 On/Off button

## GETTING READY

Be patient when first using your epilator; as with any new product, it may take a little while to familiarise yourself with the product. Take the time to acquaint yourself with your epilator; as we are confident you will receive years of enjoyable use and complete satisfaction.

- ▶ Ensure the epilator is OFF and attach the mains adaptor to the product and then to the mains.
- ▶ Ensure the epilator is OFF and attach the mains adaptor to the mains.

# ENGLISH

## HOW TO USE

Before epilating, make sure that your skin is clean, dry and free from creams or oils.

- ▶ Remove protective cap and turn the epilator on to the desired speed. Low is recommended for fine hair and high is recommended for coarse hair or stronger hair growth.
- ▶ Using your free hand, hold the skin taut to make the hairs stand upright.
- ▶ Position the epilator flat so that the stainless steel discs are at 90° angle and flat against the skin. Remington®'s epilation head is curved to ensure maximum contact with the area of hair removal. (Diagram A)
- ▶ Using small circular motions, slowly and gently glide the epilator over the skin. This circular motion is the most effective method and makes the process less uncomfortable. Alternatively, guide the epilator in a slow, continuous movement against the hair growth. (Diagram B)
- ▶ Repeat within each area until all unwanted hair is removed.
- ▶ After epilating, turn the epilator off and replace the protective cap.

### ■ ARM/LEG EPIRATION (Diagram C)

Epilate from the lower arm/leg and slowly move upwards. To epilate behind the elbow/knee, keep the arm/leg straight to stretch the skin.

### ■ UNDERARMS AND BIKINI (Diagram D & E)

Please be aware that these areas are particularly sensitive. However this sensitivity will reduce after repeated usage. For more comfort, ensure that the skin is held taut and that the hair is at the optimum length of 2-5mm. If it has been an extended period of time since you have removed hair, trim the hair with a Remington® bikini trimmer or cosmetic trimmer before epilation.

When epilating underarm, raise your arm so that the skin is stretched. Guide the epilator in circular movements. Avoid using substances which may cause irritation, such as deodorants, directly after epilation (preferably overnight).

#### ◆ CAUTION:

- ▶ For your protection your epilator may slow down or even stop if pressed too firmly against the skin.
- ▶ Do not use the epilating head on irritated skin or skin with varicose veins, rashes, spots, moles or wounds without consulting a doctor. People with reduced immune response e.g. during pregnancy, or people who suffer from diabetes mellitus, haemophilia or immunodeficiency should also consult their doctor before using this product.
- ▶ For hygiene reasons do not let another person use your epilator. It is recommended for use by one person only.

#### Why exfoliate?

Exfoliation prevents ingrown hairs. Ingrown hairs occur when the growing hair curls up under the skin instead of growing out like it should. It results in an often painful red bump and possible infections. Rubbing your skin with an exfoliation glove in the shower or bath will help reduce ingrown hairs or infections.

## CARE FOR YOUR EPILATOR

To ensure long lasting performance of your epilator, clean the head assembly regularly. Always keep the protective cap on the epilation head when the epilator is not in use.

### AFTER EACH USE

#### CLEANING THE EPILATION HEAD

- ▶ Ensure the epilator is turned off and disconnected from the mains.
- ▶ Press the head release button/s and open the head assembly. (Diagram G)
- ▶ Turn the head assembly upside down.
- ▶ Using your thumbs, push the small sides together and push the epilation head upwards. This releases the curved epilation head.
- ▶ Brush the accumulated hair from the tweezers by turning the barrel manually.

◆ NOTE: The body of the epilator is not washable. Do not submerge in water.

### TO REMOVE RESIDUE

To remove residue from the stainless steel tweezers, dampen a swab with alcohol. Gently run the swab over the tweezers until the residue has been removed.

◆ CAUTION: Make sure that the cotton swab is not soaked in alcohol as this may damage the epilator.

Not suitable for cleaning under water.

## IMPORTANT SAFETY INSTRUCTIONS

### WARNING – TO REDUCE THE RISK OF BURNS, ELECTROCUTION, FIRE, OR INJURY TO PERSONS:

- ▶ To prevent accidents, keep the product away from hair on your scalp, your eyebrows, eyelashes as well as clothes, brushes, wires etc...
- ▶ An appliance should never be left unattended when plugged into a power outlet.
- ▶ Always unplug your unit when it is not in use, unless it is being recharged.
- ▶ Keep the power plug and cord away from heated surfaces.
- ▶ This product is not washable or water resistant. Do not use in the bathtub or shower.
- ▶ Make sure the power plug and cord does not get wet. Do not reach for your unit if it has fallen into water – immediately unplug it from the electrical outlet.
- ▶ Do not plug or unplug the product with wet hands.
- ▶ Do not store your unit where it can fall into a tub or sink of water.
- ▶ Do not wrap the cord of your adaptor around the unit.
- ▶ Do not use the product with a damaged cord. A replacement can be obtained via our International Service Centres.
- ▶ Store the product at a temperature between 15°C and 35°C.
- ▶ Only use the parts supplied with the appliance.
- ▶ Keep this product out of reach of children. The use of this appliance by persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge can give cause to hazards. Persons responsible for their safety should give explicit instructions or supervise the use of the appliance.

## PROTECT THE ENVIRONMENT

- ▶ Do not dispose the trimmer in household waste at the end of its useful life. Disposal can take place at Remington® Service Centre or appropriate collection sites.

## SERVICE & WARRANTY

This product has been checked and is free of defects. We warrant this product against any defects that are due to faulty material or workmanship for a 2 year period from the original date of consumer purchase. If the product should become defective within the warranty period, we will repair any such defect or elect to replace the product or any part of it without charge provided there is proof of purchase. This does not mean an extension of the warranty period.

In the case of a warranty simply call the Remington® Service Center in your region.

This warranty is offered over and above your normal statutory rights.

The warranty shall apply in all countries in which our product was sold via an authorised dealer.

This warranty does not include cutters which are consumable parts. Also not covered is damage to the product by accident or misuse, abuse, alteration to the product or use inconsistent with the technical and/or safety instructions required. This warranty shall not apply if the product has been dismantled or repaired by a person not authorised by us.
