ABOUT YOUR FACIAL TRIMMER

WPG4200AU SPECIFICATIONS

Power System	Cordless (battery operated)
Voltage Type	1x AA battery (included)
Spare Part - Replacement Trimmer Head	SP-WPG42AU

INSERTING THE BATTERY

Your trimmer requires 1 “AA” alkaline battery (included).

1. Make sure the product is switched off and pull the base from the body. (Figure A)
2. Insert one “AA” alkaline battery, positive end up. (Figure B)
3. Align the embossed triangle on the battery holder with the logo on the base and push parts back together. (Figure C)

Use of any batteries other than alkaline will negatively affect the unit's operating performance. Batteries should not be left in the unit if the unit is not in use for long periods. To prevent battery corrosion the unit should be kept in a dry environment. Dead batteries should be removed immediately and disposed of properly. Do not use rechargeable batteries. The lower voltage in recharged batteries impairs the performance of the cutting unit.

BEFORE USE

Test a small area on an arm or leg before using your trimmer on your face. Discontinue use immediately if any sensitivity or allergic reaction occurs. Do not use on sensitive or irritated skin.

HOW TO USE

- To turn the unit on, rotate the faceted band to the right/ counterclockwise. (Figure D) To turn off, rotate the band to the left/ clockwise.
- Pressing lightly against your skin, move the trimmer head in slow, small circular motions.

- Hairs may grow in different directions. Moving your trimmer against the direction of hair growth will be most effective.
- You may use your free hand to gently stretch your skin tight which can aid in making hairs stand up to more easily enter the cutting slots.

CLEANING YOUR TRIMMER

Your trimmer is designed to give you comfortable use. To ensure that you get optimal performance from it, follow these simple cleaning tips.

After each use, brush or blow accumulated hair from the cutting unit.

1. Rotate the rotary cutter cap counterclockwise and lift off of the unit (Figure E). This will expose the hair pocket where hair particles collect.
2. Tap out shavings in the sink or waste basket.
3. Rinse both the rotary cutter cap and hair pocket under warm running water to rinse clean. (Figure F)
4. Align the little feet of the cap slightly to the right of the small gap in the top rim of the unit and place back onto unit. (Figure G) Rotate the cap clockwise and click into place

Suitable for cleaning under an open water tap.

This product conforms to radio frequency interference requirements.
