CLEANING & MAINTENANCE

Care For Your Shaver

To ensure long lasting performance of your shaver, clean the head assembly regularly. The easiest and the most hygienic way to clean the shaver is by rinsing the shaving head after use with warm water.

After Each Use

1. Turn the Shaver OFF
2. Pull the blade assembly from the unit and rinse the blades under running water.
3. Blow on the foils to remove any loose debris.
4. Brush or rinse the accumulated hair from the main body of the shaver, shaving head and cutter assembly.
5. Leave the head assembly open to let the shaver dry completely.
6. Return the shaving head to its original position and snap in place.

Note:

- Ensure that the shaver is turned off when cleaning.
- Do not clean the shaving foils with the brush.
- At regular intervals, put a drop of sewing machine oil onto the foils and cutters head.
- Rinse only with cool or warm water, not hot water. Do not rinse with water hotter than 70°C.
