

Russell Hobbs

A BRITISH ICON SINCE 1952

Q4 24

Product Catalogue

**If tea is the backbone of Britain,
then Russell Hobbs is the kettle.**

We're iconically British.

That's as much down to the style of our products as it is our brand's history, which goes way back. It's also something we're hugely proud of.

Since the day Bill Russell and Peter Hobbs founded Russell Hobbs in Surrey, we've always done things in a recognisably British way.

Take Mr Russell's **"pour half a pint of boiling gravy on it"** safety test for any new product, for example.

Creative. Resourceful. And just a little bit ingenious for a brand that's about understanding real life's ups and downs.

Welcome

to our Q4 24 catalogue

Russell Hobbs long and product history, dating back to 1952, has seen us launch a huge number of innovative and exciting new products into the market, developed around our founder's clear vision: To design and manufacture domestic appliances that are noted for their inventive engineering and innovative design.

This season we are delighted to launch our latest market leading innovation – The Calm Kettle.

Featuring a soft internal colour changing illumination, soothing sounds and a variable temperature control, the kettle offers a unique blend of striking aesthetics, practical functionality and that little moment of calm in an otherwise busy day.

It is always of great interest to hear any comments you may have regarding our Home business, and I would like to thank you for your continued support.
